**THE WILLIAMSON HAFFNER CO.**  
ENGRAVERS PRINTERS  
**OUR TALK**  
DENVER, COLO.

### PHYSICIANS

**DR. A. J. BUTTERFIELD,**  
GRADUATE VETERINARIAN  
Office, Chaffin's Livery Stable, Phone Main 1.  
Calls answered day or night

**DR. E. L. HAMMOND**  
DENTIST  
Suite 4, Crockett Building. Has phones at office and residence.

**F. R. LORD, DENTIST**  
(Successor to Dr. B. M. Williams.)  
Office Pioneer Building, over Grand Leader. Rooms 3 and 4. Phone Main 57.

### ATTORNEYS

**GEORGE H. HUNKER**  
Attorney at Law  
Office: Veeder Block Las Vegas New Mexico.

**NOTICE OF PUBLICATION**  
Department of the Interior, U. S. Land Office at Santa Fe, N. M., October 29, 1939.  
Notice is hereby given that Juliet Sheehan, of Watrous, Mora county, N. Mex., who, on April 13, 1938, made Homestead Entry (serial 01424), No. 12387, for W. 1-2 NE 1-4; SE 1-4 NE 1-4 and Lot 1, Sec. 17, Township 16 N. Range 21 E., N. M. P. Meridian, has filed notice of intention to make final commutation proof, to establish claim to the land above described, before Robert L. M. Ross, U. S. court commissioner, at Las Vegas, New Mexico, on the 17th day of December, 1939.

Claimant names as witnesses: Edward E. Johnson, of East Las Vegas, N. M.; Ernest Bagwell, of East Las Vegas, N. M.; Filiberto Pacheco, of Casa Grande, N. M.; William Smith, of Watrous, N. M.  
10-30-1m MANUEL R. OTERO, Register.

### Estray Advertisement

Notice is hereby given to whom it may concern that the following described estray animal was taken up by Apolonio A. Sena, East Las Vegas, N. M.

To-wit: One gray mare, about eight years old, unbranded.

Said animal being unknown to this board, unless claimed by owner on or before December 6, '39, said date being ten days after last appearance of this advertisement, said estray will be sold by this board for the benefit of the owner when found.

**CATTLE SANITARY BOARD,**  
Albuquerque, N. M.  
1st pub. Nov. 16, last pub. Nov. 26, '39.

If you insist upon making a lobster of yourself try and keep out of hot water.

### Forced into Exile

Wm. Upchurch of Glenn Oak, Okla., was an exile from home. Mountain air, he thought, would cure a frightful lung-racking cough that had defied all remedies for two years. After six months he returned, death dogging his steps. "Then I began to use Dr. King's New Discovery," he writes, "and after taking six bottles I am as well as ever." It saves thousands yearly from desperate lung diseases. Infalible for coughs and colds, it dispels hoarseness and sore throat. Cures grip, bronchitis, hemorrhages, asthma, croup, whooping cough. 50c and \$1.00, trial bottle free, guaranteed by all druggists.

The advertiser and the fisherman are equally fond of catch phrases.

### What Would You Do?

In case of a burn or scald what would you do to relieve the pain? Such injuries are liable to occur in any family and everyone should be prepared for them. Chamberlain's Salve applied on a soft cloth will relieve the pain almost instantly, and unless the injury is a very severe one, will cause the parts to heal without leaving a scar. For sale by all dealers.

The devil establishes a good many coalings stations along the way.

### A Card

This is to certify that all druggists are authorized to refund your money if Foley's Honey and Tar fails to cure your cough or cold. It stops the cough, heals the lungs and prevents serious results from a cold, prevents pneumonia and constipation. Contains no opiates. The genuine is in a yellow package. Refuse substitutes. Red Cross Drug Co. and O. G. Schaefer.

A barbarous question—"Does the razor hurt?"

### A Broken Back

That pain in your back caused by lumbago, stiff muscles or a strain is an easy thing to get rid of. Ballard's Snow Liniment cures rheumatism, lumbago, sore and stiff muscles, strains, sprains, cuts, burns, bruises, scalds and all aches and pains. You need a bottle in your house. Sold by Center Block Depot Drug Co.

# TURKEY GAINS FAME AS GREAT AMERICAN BIRD

(Breeder's Gazette.)

Turkey price is as high this year as the lofty tree limb on which America's greatest bird prefers to roost. This term is used advisedly, as the turkey is the feathered aristocrat of the landscape even if its avian feats do not put it in the same class as the eagle. Never will the turkey receive its dues until it has supplanted the eagle at the summit of the national fagpole. Certainly more sentiment clusters around it and, from utility's standpoint, it has always distanced the bird of prey.

Just now the turkey harvest is in the inception stage. It lasts about 90 days each year, beginning anterior to Thanksgiving day; but the fact remains that the turkey is not at its best during the Thanksgiving period. To be perfect it needs a snap of cold weather before encountering its predestined end. A few weeks of low temperature improves quality. Nevertheless turkey consumption reaches maximum proportions at the holiday period of national importance. In numbers almost incredible the birds go to the spit and in recent years the fact has become apparent that consumption outclasses production. No longer is there a turkey surplus and already the turkey of Europe threatens an American invasion. Dealers in Great Britain have planned to ship their surplus into the markets of the Atlantic coast despite a duty that was intended to be prohibitive. Turkeys are worth 20¢ to 25¢ cents per pound wholesale on the Chicago market at present and as dealers are hungry for freezing stock no bargain counter display is possible. Country prices have not ruled as high since war times and those who gather the crop deplore the fact that sections of the middle West once turkey populous now produce but few. The turkey crop of the United States has been woman-grown in the main. The young turkey is a tender bird and masculine patience is rarely equal to the task of nursing it to mature ruggedness. Millions of dollars have been produced by the farm women of the country by this means. Possibly the bird has also been the cause of many a countryside quarrel, owing to its ranging proclivity, and one reason assigned to discontinuance of breeding operations in this disposition to travel in search of food, which has made the turkey the least expensive product of the farm.

Another contributory cause of current high prices is the freezer. While turkey time is popularly supposed to be the season of Thanksgiving in the main, artificial refrigeration has placed turkey in the various cooked forms before the American gastronomist at all seasons. Although 90 per cent of the crop is harvested from November to January, the dish is as popular at summer resort hotels as at Thanksgiving feasts. Millions of pounds are securely tucked away in the freezers at Chicago and other accumulating centers, while the annual harvest is in progress, to be put into consumption channels the following season. This has been a distinct advantage to the grower, rendering glutted fall and winter markets impossible and giving prices a stability lamentably lacking under the old method of distribution when

turkey had no place on the menu card save around the holidays. The early-killed turkey is however of no value for freezing purposes and the surplus of the Thanksgiving day quota must be consumed immediately. It is the turkey killed after a touch of frost that fills refrigerators and makes the summer delicacy possible. Only after going through the freezing process, according to trade opinion, does the flesh of the turkey attain maximum quality. Accumulation of reserve stock in freezers began in 1895 and has revolutionized the trade. Prior to that time 50 per cent of present prices were regarded as satisfactory to growers and the bargain counter was piled high to prevent total loss of a considerable proportion of the crop.

In a few years the entire method of harvesting has changed. Instead of shipping live birds long distances, a barbarous and costly method especially when a fat turkey costs from \$1.50 to \$2, killing and plucking is now done at central plants located in the interior. After being properly cooled the dressed product is forwarded to the large cities for freezing or immediate marketing. The only by-product is feathers which have a value especially those of the white turkey which find their way into the millinery trade, the bulk being exported.

Turkey production is not widely distributed although there are vast areas where it ought to be highly profitable. Of the Southern states, Texas, Kentucky and Tennessee are most productive. In Texas the industry is developing, turkeys from that section being popular owing to excellent quality and light weight. A few years ago the Texas turkey had poor market standing and its growing importance is due to improvement in gathering and dressing facilities. Tennessee and Kentucky turkeys are super-excellent in quality and without the contribution of those states semi-famine conditions would exist. Southern Iowa is a prolific source of supply, but for some reason or other Northern Iowa has practically abandoned this source of revenue. Probably more birds are raised in the northern counties of Missouri than any other area of similar size and the Missouri turkey is a prime favorite with freezers. West of the Missouri river production is scant and Pacific coast cities which consume more per capita than any other section of the world, draw on dealers in the Mississippi valley for the major part of their requirements. Illinois, southern Wisconsin and southern Michigan produce moderate turkey crops, but Indiana and Ohio are heavy contributors. The East depends on the central West largely, and if Boston had no other source of supply than the New England states it would fare badly, as the Hub is credited with eating more turkeys in proportion to population around Thanksgiving day than any community in the union. New York, of course, by virtue of its enormous population uses the greatest number of birds, but its large foreign element puts it behind Boston on a per capita basis. New York is a large consumer of the turkey all the year around, especially during the summer season, and when tourist travel is heavy a reserve stock of between ten and fifteen million pounds soon melts away.

Turkey consumption still reaches maximum height on Thanksgiving day when New York picks the bones of 300,000 birds approximately; Chicago, 250,000; Boston, 150,000 and other cities in proportion.

No reliable statistics have ever been compiled respecting annual production and crop value but taking into consideration home consumption, it is enormous. Reserve stocks going into freezers are worth millions of dollars alone. It is one of America's farm products that has never been adequately valued.

Dealers are now engaged in a campaign of education having for its object the maturing of the crop on the farm. They are naturally averse to handling turkeys before Thanksgiving day, owing to unfavorable weather conditions, and the fact that the birds are immature at that season. This means that the principal feature of the Thanksgiving dinner will cost more as the years roll by, unless prices stimulate production. "We are making strenuous efforts to induce growers to carry their turkeys into cold weather, feed a few weeks and get the benefit of added value due to extra weight and improved quality," said one of the heaviest dealers in the west. "After frost turkeys put on weight rapidly and gain in quality. The market calls for fat turkeys and it will be money in the grower's pockets to sell only in that condition. Trade is so hazardous during November that the dealer would be as well satisfied if the turkey was supplanted by something else at the Thanksgiving feast. Even the most vigilant inspection does not prevent loss. After the middle of December we can begin gathering with confidence that spoilage will amount to nothing."

How much the grower has benefited by the new method of marketing, through the freezer route is indicated by the fact that back in the early nineties, before reserve stocks were accumulated for summer consumption, 4 to 6 cents per pound were ruling prices at country points. Dealers assert that the ultimate result of their campaign of education will be further enhancement of values owing to increased weight and better quality. In other words the market of the following summer and not immediate holiday demand will make prices.

Turkey history is coincident with that of the country. The species is indigenous. It is the only purely American bird, having been here in company with the red man. Unlike humane aborigine, however, it has proved susceptible of domestication and, crossed with the European species, has developed into the bronze turkey, the bird of modern commerce.

Tradition has it that the Cabots on one of their trips to America took back to Europe three Indians and two turkeys and to that stock the old world owes its domestic flocks. The turkey probably has become so closely associated with Thanksgiving because it furnished the best at the disposal of the pioneer. There is some uncertainty surrounding the origin of the modern turkey of commerce but the late "Long John" Wentworth, a pioneer Chicagoan, was accustomed to claim credit for developing the bronze variety. Whoever was responsible is entitled to a vote of thanks as a more useful bird does not exist. Alive or dead, it is the farmer's friend. As a destroyer of insect pests it has no equal among the feathered tribes and there is invariably a noticeable increase in the ravages of these pests when turkey cultivation declines. Both practically and from a sentimental standpoint the turkey is the ideal American bird.

# UNITED STATES GUARDS PEACE OF THE PACIFIC

The selection of Pearl harbor as our principal naval base in the Pacific is a wise one, and President Taft's action will be approved by not only the military and naval experts, but by the entire population of the United States. This location gives our fleets in the Pacific the same advantage of position as is employed by Great Britain at Malta as far as the Mediterranean sea is concerned.

But it is a safer base than is Malta by reason of its greater distance from the base of operations of the navy of any foreign nation.

France could strike at Malta from Tolo, Italy from Venice, Austria from Trieste, or all three combined could, if engaged in hostilities with England, mass their fleets before Malta within forty-eight hours after opening of hostilities.

Not so with Pearl harbor. Hostile fleets from no foreign base of operation could reach it in less than a week or ten days, and a siege or blockade for any length of time would be an impossibility so far from supplies and repairs.

With the fortifying of Manila and Olongapo to the highest point of efficiency as points for defense, and as bases for offense, if offensive operations be required, we can establish close to Asia our Gibraltar in the Orient.

Never again will there be an American squadron in any portion of the world that will be without a home base of operations; as was the squadron under Dewey in Asiatic waters in 1898.

It may take five or even ten years

to make the Philippine bases and that of Pearl harbor impregnable and to provide them with the facilities to equip, repair and supply the great fleets that will depend upon them for all naval needs in event of war.

The American people want the work well done, thoroughly done and completely done, cost what it may, and they expect it done as speedily as it can be done in the very best possible manner.

With San Francisco bay and Puget Sound as the bases upon our coast line and Pearl harbor base almost directly west of the Panama canal, the Pacific end of that great waterway will be well guarded by our war vessels from enemies coming from north, south or west of the Pacific.

With our powerful fleet at Manila and Olongapo no Asiatic nation will uncover its own coast by sending fleets to attack the cities of our western coast.

Once the canal is opened to the transit of our fleets from ocean to ocean our naval strength will be almost doubled through our power of concentration on either coast.

By the time the canal is expected to be completed our naval strength will have attained such a maximum that no nation will seek a war with us, and neither now nor in the future will our people provoke a war with any other country.

The American republic prepares for war, but only to defend her interests and her rights.

The American republic desires no war with any nation. Her people wish "peace upon earth and good will toward men."

teen million pounds soon melts away. Turkey consumption still reaches maximum height on Thanksgiving day when New York picks the bones of 300,000 birds approximately; Chicago, 250,000; Boston, 150,000 and other cities in proportion.

### No Case on Record

There is no case on record of a cough or cold resulting in pneumonia or consumption after Foley's Honey and Tar has been taken, as it will stop your cough and break up your cold quickly. Refuse any but the genuine Foley's Honey and Tar in a yellow package. Contains no opiates and is safe and sure. Red Cross Drug Co. and O. G. Schaefer.

### POSTOFFICE CLERK PLEADS NOT GUILTY

Albuquerque, N. M., Nov. 22.—Arthur R. Smith, colored, a clerk in the local postoffice, who was arrested last Thursday on the charge of embezzling money from the mail, will be given a hearing tomorrow afternoon at 2 o'clock before Major Whiting, United States commissioner, in Old Albuquerque.

Smith was arraigned Saturday morning and pleaded not guilty to the charge. Either D. J. Leahy, United States attorney in New Mexico, or his assistant will be here to represent the government in the case at the hearing Tuesday.

\*\*\*\*\*  
YOUNG PEOPLE'S NOTES  
\*\*\*\*\*

The young people of the Presbyterian church had a very pleasant meeting last night. While not a great many were present those who did attend were more than repaid. The topic was one of the Thanksgiving and was ably handled by Mr. Fletcher.

Next Sunday "Allens or Americans" the very interesting Home Mission book will be continued.

A little social time is planned for Tuesday evening of this week by the society.

**KC Baking Powder**  
Complies with all Pure Food Laws

### Y. M. C. A. NOTES

Those who are in the Human Phys. Organ for the Y. M. C. A. entertainment Thursday, will meet tonight for rehearsal at 7:45.

A very interesting game of basketball was played at the Y. M. C. A. last Wednesday afternoon by the Y. M. C. A. stars and a team composed of a picked group who will go under the name of the Y. F. C. A. moon. The game was exciting and very close throughout. The score at the end of the first half was 8 to 8 and the second half closed with the score 17 to 13 in favor of the stars.

Another game was played Friday night between the working boys and a team from the high school. The score was not so close and the game not so good as the one played between the younger sets.

The relay course was laid out Saturday afternoon and as soon as the trout have been held the men will be placed at their stations. The relay committee will meet tonight to make the final arrangements for the race.

The course will be as follows: Starting at the Y. M. C. A., up Sixth street to National, west on National to the plaza, out to the Hot Springs boulevard to the asylum, back on the boulevard to the plaza, down Bridge street to Twelfth street, down Twelfth street to Douglas, Douglas to Eighth, on Eighth to Jackson, down Jackson to Railroad avenue, on Railroad avenue to Main, west on Main to Seventh street, south on Seventh to Douglas, east on Douglas and back to the association building.

Mr. Fitzsimmons organized a Bible class for boys last Wednesday with twelve boys as a starter. It is lively, dozen, however, and the class is bound to grow and be a popular organization.

The association was able to raise work for two young men last Monday. They go with Mr. Rice on a surveying trip. Both boys are well pleased.

Most housekeepers are using K C Baking Powder these days. A single trial shows it to be a great improvement over the old-style Baking Powders and a fine economy in any household. K C costs less—works better.

A red-headed widow is a very lucky thing for her first husband.

### Croup Cured and a Child's Life Saved

"It affords me great pleasure to add my testimony to that of the thousands who have been benefited by Chamberlain's Cough Remedy. My child, Andrew, when only three years old, was taken with a severe attack of croup, and thanks to the prompt use of Chamberlain's Cough Remedy his life was saved and today he is a robust and healthy boy," says Mrs. A. Coy, Jr., of San Antonio, Texas. "This remedy has been in use for many years. Thousands of mothers keep it at hand, and it has never been known to fail. For sale by all dealers."

After a man is married he never buys a hammock ball for two.

### Consumption Statistics

prove that a neglected cold or cough puts the lungs in so bad a condition that consumption germs find a fertile field for fastening on one. Stop the cough just as soon as it appears with Ballard's Horehound Syrup. Soothes the torn and inflamed tissues and makes you well again. Sold by Center Block Depot Drug Co.

All men who can bottle their wrath are not corks.

# CATARRH

**ELY'S CREAM BALM**
